Terra Cotta

IMPREGNATION ANTI-petre:

- Anti-ANTISALP saltpeter (former PR101 + CTL).
 - In case of appearance of white patches on some tiles, sweep and scrub with highly concentrated acid PROCIDEX
 - Spray with a garden sprayer output per strip wetting property soil (baseboards with a brush). 100 to 400 g per m2 depending on the type of material.
 - Wait 10 minutes and wipe off excess with a rag soaked in white spirit.
- We have to ventilate the room and especially do not smoke during application.
